

# Increase revenue and improve care by making documentation and coding easier for your PCPs

While initiatives to improve risk adjustment and quality coding are essential for better value-based care performance, the amount of time, effort, and resources required to participate can be burdensome. Other solutions, such as home assessments, cut PCPs out of the clinical and financial loop. The “technology-only” solutions frustrate PCPs because they lack any clinical support and QI review, which can lead to unvalidated codes.

## Vatica’s four-part solution makes this task easier for PCPs

- 1 Vatica’s licensed nurses curate all relevant clinical data from the EMR and health plan to inform comprehensive visits
- 2 Only vetted HCC codes and care gaps are presented to the PCP to minimize alert fatigue
- 3 Vatica’s quality improvement team (clinicians with advanced coding certifications) reviews all codes and documentation to ensure accuracy
- 4 After the visit, Vatica submits CPT-II and G codes to your participating health plans

## Vatica’s hands-on, free support provides

- Licensed nurses and administrative resources that are dedicated to PCPs’ practices
- Pre- and post-visit chart preparation, training and ongoing clinical support; we do 90%+ of the work
- Reduced burden on PCPs and their staff
- All of this with zero cost to your practice

Your PCPs didn’t go to medical school to become coders. With Vatica, your PCPs will receive vetted HCC and quality data, enabling you to improve clinical and financial performance. Vatica’s services are covered by one or more of your health plans.

**“Vatica dedicates licensed nurses and support staff to our risk adjustment program—they are a real game changer! They have become an extension of my team, making the process easy and efficient.”**

**— Monica Ranaletta, DO**

# Returning health risk assessments to where they belong: the PCP

Risk adjustment and quality of care programs are essential, but the old ways of doing them are inefficient, create provider and patient abrasion, and create greater compliance risks.

Vatica's unique, physician-integrated solution pairs expert clinical teams and easy-to-use technology at the point of care to greatly enhance performance, compliance and member experience.

## IT'S TIME TO PLACE THE PCP BACK AT THE CENTER OF CARE.

	RETROSPECTIVE SOLUTIONS	HOME ASSESSMENTS	VATICA
<b>PROVIDER BENEFITS</b> Retrospective and in-home solutions work around PCPs. Vatica empowers PCPs to improve care and generate revenue with payer-sponsored risk and quality programs designed to improve coding accuracy and documentation.	33%	0%	100%
<b>COMPLIANCE</b> Risk adjustment programs are under greater scrutiny by CMS and the OIG. As a compliance-first company, Vatica uses expert clinicians and proprietary technology to ensure all codes are accurate and clinically validated.	50%	25%	100%
<b>CLINICAL &amp; ADMINISTRATIVE SUPPORT</b> Our licensed clinical nurses and administrative support staff do 90% of the work so that PCPs can focus on delivering high-quality care.	50%	0%	100%
<b>WORKFLOW INTEGRATION</b> Our EMR-agnostic platform is easy to use, workflow-agnostic, and designed for point-of-care use to capture all relevant clinical data and documentation.	25%	0%	100%
<b>QUALITY OF CARE</b> Follow-up care is rarely done with home assessments and other solutions. As an extension of the PCP, our technology utilizes real-time clinical data to empower providers to view and close gaps in care.	0%	33%	100%
<b>OUTCOMES &amp; PATIENT EXPERIENCE</b> Vatica's prospective solution places physicians back at the center of care to diagnose, document and follow up. Other solutions drop off after collecting codes, leaving patients and physicians out of the clinical and financial loop.	0%	25%	100%
<b>VALUE-BASED CARE</b> Vatica's clinical and administrative resources, armed with powerful technology, help providers succeed in value-based care arrangements by improving coding specificity, supporting documentation, care gap closure and follow-up care.	0%	0%	100%
