

Vatica's process is efficient—only a few minutes

"We have so many things to keep track of, it's nice have this support," notes Daniel Van Riper, MD. "Having Vatica help identify and code all active conditions and getting that health plan program revenue* for doing so is incredibly valuable."

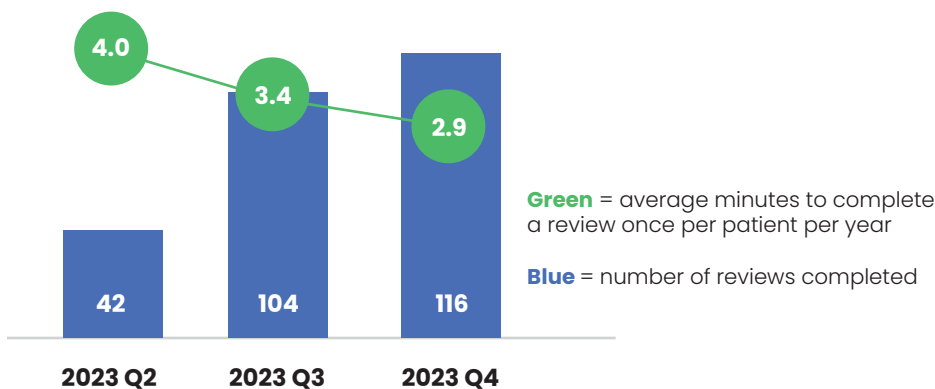

"Vatica gives me everything I need to make a clinical determination." – Dr. Van Riper

Dr. Van Riper finds the application particularly user friendly. "I can review these records while doing other things. I don't have to refer to the patient's chart because Vatica put the information right there for me. I can review a record in 2-3 minutes. Vatica gives me everything I need to make a clinical determination."

The chart below shows how the practice's review time decreased as they gained experience using Vatica.

Time to complete Vatica's coding exercise improves with experience

Daniel Van Riper, DO
Family physician

*Due to more accurate and complete coding and documentation, as well as additional program revenue

Vatica benefits

- More accurate and complete coding
- Health plan program revenue for completed visits, which helps address the rising cost of operating a practice
